

CONNECTED RETAIL SOLUTIONS

Many retail businesses rely on landline connectivity to take credit card payments, run instore inventory processes and provide free Wi-Fi to customers.

If a problem occurs with the landline or fixed wire connection, it can have a significant impact on business operations, resulting in loss of revenue and frustrated customers.

Providing a cost-effective, secure and reliable cellular back-up connectivity option offers peace of mind and an uninterrupted service for staff and customers.

Arkessa enables service providers to deliver flexible, cost-effective and resilient 4G connectivity solutions to a wide range of retail businesses.

CELLULAR BACK-UP CONNECTIVITY

Arkessa offers a flexible connectivity solution using fixed, aggregated & PAYG models and roaming or singular network tariffs over 4G LTE networks. We can tailor solutions to retailer business models to keep them connected.

COST-EFFECTIVE

Arkessa provides flexible pricing packages based on location, data usage and technical requirements.

RESILIENT

A cellular back-up solution keeps down-time to a minimum, and helps retailers continue to take payments while delivering an optimised customer experience.

SECURE

Arkessa offers secure cellular connectivity via all UK networks, plus a number of multi-network roaming options.
